THE
GLASS
COLLECTION

SMART SWITCHES

VITRUM THE GLASS COLLECTION

Vitrum is the line of smart devices designed using innovative methods and materials.

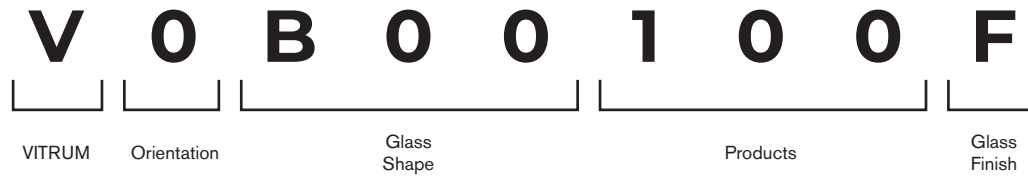

Use of an innovative as much as ancient material such as glass makes for a stimulating tactile perception and high profile sensorial impact.

Glass, essential lines, luminosity and harmony, transform simple switches into items of design with an absolutely unique aesthetic and functional identity.

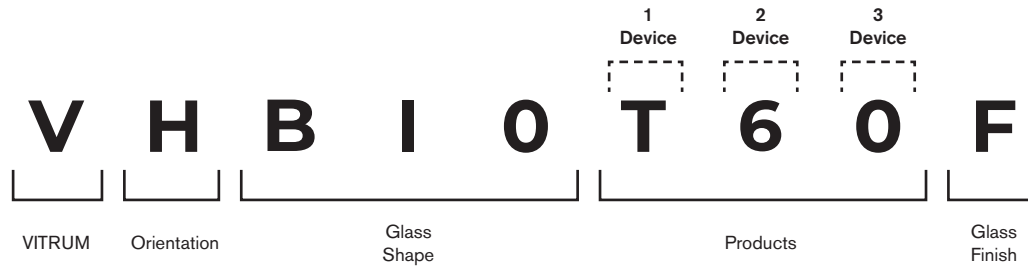

The design is exceptionally versatile and can be personalised with different colours, icons and screen prints.

SWING CUSTOMIZATION

The new series is available in black color, and offers the possibility of customizing the icons with the proposals available in the catalog. The icons feature extremely clear and legible laser machining, which are backlit in RGBW, and can be associated with specific colors depending on the functionality or mode chosen (e.g., for 'Night Light', 'Do Not Disturb' or 'Make-up Room' modes).

AXIA

THE METAL
SWITCH
COLLECTION

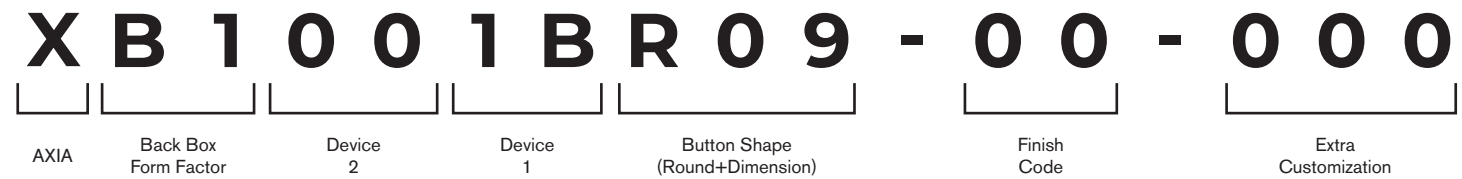

AXIA THE METAL SWITCH COLLECTION

Our prestigious collection designed to give architects multiple choices of metal finishes to unleash the power of their imagination.

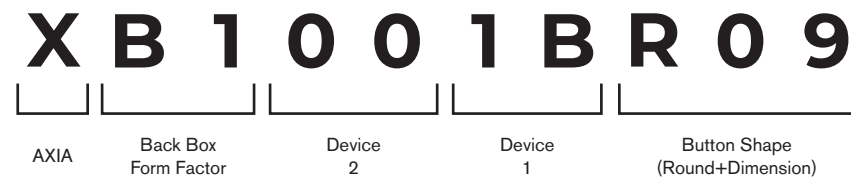

Axia has great aesthetic potential provided by the possibility to coordinate the two elements making up the device, namely the magnetic plaque, and the support anchored to the wall.

AXIA CUSTOMIZATION

Axia Collection presents a wide range of aesthetic solutions that can be obtained by combining the two elements of the device: the magnetic faceplate and the support frame anchored to the wall. Wide selection and refined finishes for a new generation of mechanical switches.

AXIA MAINTENANCE

Do not treat with detergents, nor should grainy or rough sponges be used to clean with.

Limestone contained in water will leave small stains on the surface. To remove such stains we recommend to use a good quality and easy-to-remove creamy cleaning product. Strong detergents generally available commercially must not be used. Do not use any abrasives such as steel wool, sandpaper, or any sharp objects that could scratch the faceplate. Metal objects namely scissors, tin cans, grids, etc, when left in contact with surfaces for a long period, especially if wet, can cause the formation of rust stains.

EVERYDAY CLEANING: WHAT TO USE AND HOW

1. VARIOUS HOUSEHOLD CLEANERS SUCH AS

- water and vinegar (20% vinegar, 80% water).
- detergents for cleaning windows (as long as it is not an abrasive), remember to dry the surface to avoid limescale stains.

2. CREAM FOR STAINLESS STEEL

- spread the cream with a wet rag, rub lightly, leave on and rinse with water.
- finally polish with a dry cloth.

DO NOT USE

- products containing chloride, especially those containing hydrochloric acid.
- hypochlorous acid-based bleaches.
- products generally used to clean silver.

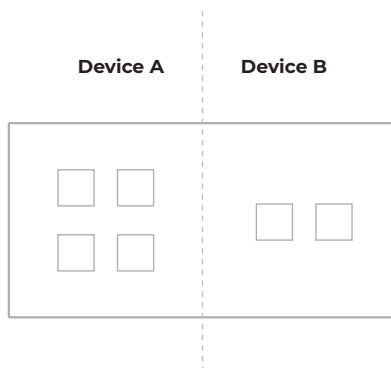

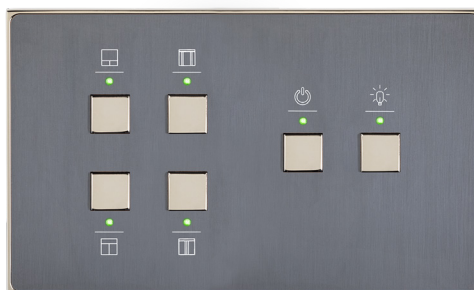

If such products accidentally come into contact with the stainless steel surface, the magnetic faceplate must be removed and rinsed with water.

WARNING!

The corrosion resistance of stainless steel is invalidated by acids and halogen compounds such as chlorine, bromide, iodine.

AXIA COMBINED PANELS

It's possible to combine up to 2 Axia panels.
Price is obtained by adding the prices of the single unit.
